

Discussion Questions

1. It's human nature to want our problems to go away, but they rarely do so on their own. Why do you think God has made the world in a way where things don't just magically sort themselves out?
2. How has your soul been given low priority in this mad, distracted world?
3. Do you have some neglected places in your soul that need attention this coming week? "If so, can you name a specific area where you would like to pursue soul restoration (i.e., perhaps an area God revealed to you during Pastor Cindy's message)?"
